Delaware State University University College Testing Services and Programs

If our customers are happy, we are happy.

The mission of the Testing Services and Programs Office is to assist DSU students and the surrounding communities in assessing their knowledge, skills, and abilities as relates to higher and continuing education by providing a variety of programming to engage and promote student success and testing credentialing certifications. This is accomplished through the use of written, computer-adapted assessments, workshops, and testing instruments.

Testing Services and Programs is committed to a diverse environment that encourages students and staff to function independently while demonstrating their inter- and intra-dependence as members of the collegiate community. We set the standard of excellence in the testing center by providing quality services to our DSU community, surrounding communities in Delaware and the Atlantic Region.

Delaware State University, University College, Testing Services and Programs subscribes to the NCTA Professional Standards and Guidelines.

Effective October 15, 2015 \$15 reschedule fee for all test candidates.

Study Skills Inventory

The College Level Study Skills Inventory will assist in providing students immediate feedback on their current approach to college level study skills. There are six critical study skills college students need to consistently be developing: text book reading, note taking, memory, test preparation, concentration, and time management. At the conclusion of the inventory, each of these skills will be assessed based on the manner in which the questions were answered.

Please contact Testing Services and Programs for workshop dates or individual sessions.
(302) 857-6144

Getting Connected for Student Success

University College, Testing Services and Programs is here throughout the semester to provide testing strategies workshops that cover exclusive problem-solving techniques and test-taking tips facilitated by our certified test administrator and testing specialist. The workshops focus on strategies and critical thinking skills needed for the exams. Students will be introduced to a systematic approach to answering application and analysis-level questions. Students will learn how to break each question down and identify common traps. Students will also learn tips to help develop test-taking skills for before the test and during the test, as well as develop endurance techniques to help them finish strong based on resources from Education Testing Service (ETS) and College Board.

For more information, please email call (302) 857-6144
